

3M Skin Health and Wound Care News

The latest advances in skin safety solutions, practices and procedures

APRIL 2017

Visit us at SAWC Spring – Booth 545.

Wound care is where science meets art. It's a practice that requires your specialized training and expertise, as well as your instinct and intuition. Our latest innovations are designed to help you manage and maintain skin integrity, because effective wound care starts with skin care.

Sometimes, caring for wounds means getting creative. Stop by booth 545 at SAWC Spring and show us how you bring science and art together, while discovering how 3M Wound Care Solutions can help you advance your wound care practice.

Wound Care Corner

The ABCs of VLU management.

An international group of experts examined VLU assessment and diagnosis, compression therapy, and best practices in wound and skin care management – then developed a simplified ABC treatment model.

Skin Integrity Insights

Have you thanked a WOC nurse?

To the WOC nurses who inspire hope and empower healing, we thank you for your tireless commitment to patient care. For WOC Nurse Week, April 16-22, thank a WOC nurse that goes above and beyond for her/his colleagues and patients.

The Science of Securement

Effective methods for securing critical tubes.

Patient care and safety is your top priority, and securing critical tubes is something you don't take lightly.

Check out these videos of safe, effective methods for securing Foley platforms as well as endotracheal, nasogastric and surgical tubes.
