

Making indoor air quality a priority, **so we can all breathe a little easier**

You may not give your office air much thought—but HP does. HP voluntarily designs and tests the indoor air quality (IAQ) performance of home/office printers and supplies to meet eco-label emissions standards.¹

HP doesn't compromise when it comes to IAQ—**why should you?**

People spend much of their time indoors, where the levels of common air pollutants can be two to five times higher than outdoors, making IAQ a serious health concern.²

That's why HP voluntarily designs and tests its printing systems³ to meet the strictest eco-label guidelines.

When you choose Original HP toner cartridges, you're helping to maintain a healthy indoor office environment.

Designed, manufactured, and tested **for your peace of mind**

Original HP toner cartridges—when tested together with HP printers and paper—help meet the most stringent emissions standards for IAQ, including:

- Blue Angel⁴
- EU Indicative and Binding Occupational Exposure Limit Value⁵
- German Occupational Exposure Limit Value⁶
- German Guide values for Indoor Air⁷
- Nordic Ecolabel⁸
- WHO Indoor Air Quality Guidelines⁹

Do you use Blue Angel as a purchase requirement?

Using only Original HP cartridges can give you confidence your HP printing system³ will perform within Blue Angel guidelines.

Don't compromise on health and indoor air quality

Through all phases of product development, HP works hard to deliver high-quality toner cartridges that can not only meet your printing needs, but also your IAQ guidelines. With Original HP toner cartridges, you can help:

Maintain a healthy indoor office environment

Prevent exposure to elevated levels of volatile organic compounds (VOCs)

Meet Blue Angel or other eco-label purchasing requirements
